PROFILE

Hello, I'm Ashwini Sadanshiv – a passionate Web Designer and aspiring Frontend Developer with a knack for crafting captivating online experiences.

My journey in the world of web design began 6 months ago when I found my niche in designing dynamic websites using WordPress. Through hands-on experience with live projects, I've honed my skills and developed an eye for creating visually appealing and user-friendly websites.

My drive to solve problems and my firm belief in the mantra "Learning never ends" have propelled me to seek new challenges. I've not only embraced the technical aspects of frontend development, mastering HTML, CSS, and JavaScript, but I've also undertaken independent projects that showcase my capabilities.

Beyond the digital realm, I'm an avid artist who finds inspiration in drawing, reading comics and novels, and expressing myself through dance. These creative outlets provide a fresh perspective that enriches my design philosophy.

Currently, I'm on the lookout for an internship opportunity in Web Designing that will allow me to contribute my skills and learn from experienced professionals. I'm excited to take the next step in my career journey and continue to evolve as a web designer.

If you're passionate about web design, front-end development, or creating engaging online experiences, let's connect! I'm eager to engage in conversations, collaborations, and new opportunities.

.

Best regards,
Ashwini Sadanshiv
